The Tractor Bunker Wizard is designed to be pulled behind the Toro Sand Pro, John Deere 1200 and other brands of mechanical bunker rakes to prep the sand in the mornings for the day's play. The result is a smooth, level, consistent and uniform surface throughout the bunker that dramatically improves the look and playability without leaving any unsightly rake marks whatsoever!

Works Great in Wet or Dry Sand!

Spring 2021 Delivery!**

100% Made in the USA!
multiple patents pending

The spring tines scarify the sand first, then the wire rollers fling the sand into the air creating a rooster tail of sand that lands smooth, level and uniform without any unsightly or shot-destroying rake marks. The outer rollers articulate to handle most bunker contours with ease and perfection. The look and playability is second to none!

The powder-coated steel construction, aluminum hubs with triple-sealed stainless ball bearings, heat-treated stainless spring temper wires and replaceable spring tines ensures the that Tractor Bunker Wizard will last for years.

The Tractor Bunker Wizard is a 5-roller, 70"-wide, pull-behind sand-smoothing unit for use with the Toro Sand Pro, John Deere 1200 and other brands of mechanical bunker rakes.

\$7,499

The Bunker Wizard was designed by former USGA Champion, Jim Sorenson and Dr. Steven M. Tipton, PhD Stanford University and Co-Chair of the Mechanical Engineering Department at the University of Tulsa.
